

# Succeed!

A. Budget practice: Let's say you have \$100 to spend each month. How would you spend on each of the following expenses?

Video games  
\$5

Snacks  
\$3

Books  
\$5

New clothes  
\$10

New shoes  
\$5

Pet supplies  
\$10

Movies  
\$2

Pack of gum  
50¢

B. Let's think about it!:

How much money did you spend? \_\_\_\_\_

How much money did you have left over at the end of the month? \_\_\_\_\_

Why did/didn't you spend all \$100? \_\_\_\_\_

Go back and circle the items above that were needs. Draw a square around the wants.  
Is there any way that you could have saved money while still spending on all your needs?

---

---

## Take it further

You have thought about ways that you can reach your goals by NOT spending money, or spending less. You can do the same by practicing with cut out coupons from your local newspaper flyers. Cut out a few that interest you and take them to the store with you to practice how they work. You'll be amazed at the money you can save!
